

Who can view my Workspaces & How-To Change the Permissions

Graham Smith - 2024-08-05 - [Workspace Managers](#)

IMPORTANT NOTICE: As of "17th July 2023" **Private** workspaces have been changed to **Confidential**.

Workspace privacy and permissions give you complete control over what your users can see and do within your workspace.

As a workspace manager, it is important to know whether your workspace is Open, Restricted, Private, Confidential, or Custom.

Go to the **Workspace Dashboard** & view the **Workspace Information** section containing the **Workspace Privacy**.

Workspace Information

-  13 members
-  Only visible to registered users. Memberships must be approved.
-  [Contact the workspace manager](#)

Your **Workspace** may not have the **Workspace Information** item/widget, so you must review the **Workspace Settings**.

1. Click the **Manage Workspace** "cogwheel icon" and select **Settings** from the drop-down menu.
2. Click on the **Permissions** tab at the top to review the **Workspace Permissions**.

Workspace Managers can change their **Privacy** settings from this page.

The one selected is the current workspace's access level/privacy.

To change it, select one from the list and click **Save**.

These are the available options.

Privacy

- ☒ **Open** The workspace and its content are visible to all Users. Users can join without being invited.
- ☐ **Restricted** The workspace and its content are visible to all Users. Users can request to join.
- ☐ **Private** The workspace content is only visible to Members. Users can see the workspace name and request to join.
- ☐ **Confidential** The workspace and its content are only visible to Members - people you invite to join.
- ☐ **Custom** The workspace has custom settings

Kahootz Tip: The custom option shown above can only be applied via support.

How do I know if my workspace is viewable to the public

You'll see the **Custom** option above, which allows even more control over the settings.

Using the **Custom** option, you can set a workspace so that the content is only visible to members. But anyone (even members of the public) can see that the workspace exists and can request to join.

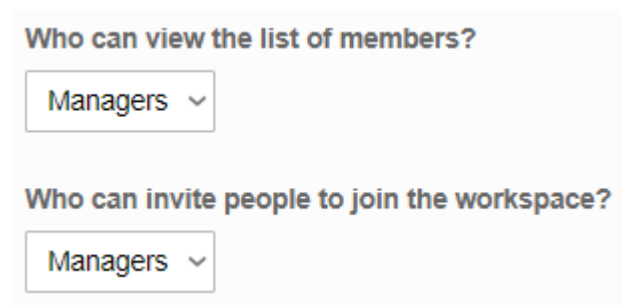

When someone visits a workspace, they can see its existence but not its contents; they're shown a "Request to Join" link.

The request to join is sent to the Workspace Managers, who can review & invite the person to that workspace if they wish.

If you cannot see the **Custom** option & wish to make your workspace publically accessible, contact [Kahootz Support](#).

Who can view the list of members and invite people to join the workspace?

You can also choose **who can view the list of members** and **who can invite people to join the workspace**.

The image shows a screenshot of a workspace settings interface. It contains two sections, each with a title and a dropdown menu. The first section is titled 'Who can view the list of members?' and has a dropdown menu with 'Managers' selected. The second section is titled 'Who can invite people to join the workspace?' and also has a dropdown menu with 'Managers' selected. The dropdown menus have a small downward arrow icon.

This controls who can see a list of users in your workspace who are allowed to [invite](#) others to your workspace.

It's automatically set to **Managers**; however, you can change the drop-down to **Members** if required.

It's generally set to **Managers**; however, you can change the drop-down to **Members** if required.

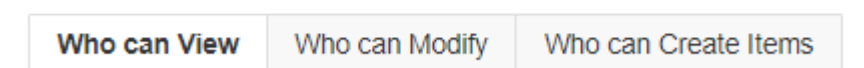

Reviewing Permissions

You can also **Review Permissions** across the entire workspace via **Manage this Workspace**.

Click the **Manage Workspace** "cogwheel icon" and select **All Manager Functions** from the drop-down menu.

Then, from the left-hand side, select **Review Permissions** from the available options.

Review Permissions

The image shows a screenshot of the 'Review Permissions' interface. It features three tabs: 'Who can View', 'Who can Modify', and 'Who can Create Items'. The 'Who can View' tab is currently selected and highlighted with a light blue background. The other two tabs are in a light gray background.
