Can I use my company's Name/Web URL for my Kahootz site?

Software Support - 2019-07-01 - [Support & Troubleshooting](#)

Yes. Although *yoursitename.kahootz.com* is the service default, with Kahootz Enterprise our consultants can work with your IT team to use your website address and apply your own personal SSL certificate.

Note: Your Kahootz Enterprise license must have a minimum of 250 users and additional consultancy costs will apply.
