Database Entry Forms

Overview

Database entry forms enable users to contribute new entries to your databases. These forms serve as the primary interface for data collection, allowing streamlined information gathering with customisable fields and permissions.

Managing Entry Form Permissions

Control who can add entries to your Database by configuring appropriate access levels:

- 1. Go to Manage Database
- 2. Select Permissions
- 3. Adjust user access settings according to your requirements under Permissions on Entries

Customising Entry Forms

Enhance your experience by personalising your entry forms with targeted information:

- 1. Go to Manage Database
- 2. Select Entry form settings

You can now customise a range of options for your entry form:

- Custom Page Title: Replace the default title with one specific to your data collection needs
- Custom Description: Add context-specific instructions or explanations
- Where To Go Next: Specify where users are directed after form completion; you can choose from:
 - 🛛

Configuring Entry Form Questions

How questions are presented depends on column types. To configure questions:

- 1. Go to Manage Database
- 2. Click on the database column you wish to modify
- 3. Update the Column Name to the question you want to ask
- 4. Add Guidance text, where more context on the question is needed
- 5. Configure the questions with options around presentation format, default values, whether the question is mandatory etc where available

Reordering Entry Form Fields

You can change the order in which form fields appear on your entry form by:

- 1. Go to Manage Database
- 2. Select Column Order
- 3. Use the drag-and-drop interface to arrange questions in your preferred sequence

Making Entry Forms Public (Preview feature, Enterprise only)

You can share entry forms outside of your Kahootz site and workspaces by making them publicly available for anonymous entries

- 1. Go to Manage Database
- 2. Select Public data entry form
- 3. Enable the form by toggling the switch under Settings
- 4. Save changes to generate a shareable public link

Public Entry Forms Settings

To control how the public entry form is used, you can also

- Define start and end dates for form link availability
- Reset the public link if needed to create a new form link
