If you have any issues following the steps, please contact our [support team](#). They'll be able to provide any assistance and update the article if required.

One of the many ways to [customise your Kahootz dashboard](#) is to embed Twitter timelines & tweets.

You can then view tweets for relevant accounts using @username without leaving your workspace.

Please follow these instructions to embed a timeline feed\tweets to your Kahootz dashboard.

Twitter...

1. Go to X (Twitter) website (<https://twitter.com>) and search for an account or person.
2. View their profile and remember\copy their @username, for example, [@Kahootz](#).

Kahootz...

1. Now, go to the dashboard where you wish to add your X (Twitter) timeline.
2. Click on the “**Configure my dashboard or Workspace dashboard**” depending on which one.
3. Click the “**Add item**” button and select ‘**X (Twitter)**’ from the available options.
4. Select ‘**X (Twitter)**’ from under the **Integration** section.
5. Paste the **@username** into the X (Twitter) window.
6. Provide it with a name, max height & background.
7. Click “**Close**” to minimise the side window.
8. Click “**Save Changes**” at the bottom.
9. Your X (Twitter) will now show.

Tip: If you're logged into X (Twitter) your tweets display in date order
Your tweets will be displayed in count order if you're not logged in.
