## How-To enable Power BI or Tableau Reports on your Site

Software Support - 2021-08-12 - [Site owners](#)

You can include business intelligence and data visualisation by integrating Power BI & Tableau Reports via your dashboards within Kahootz for any users who have access to review and analyze that data.

Before you can apply these features to your site, you'll need to have them enabled within your site's configuration.

- i** Power BI & Tableau Reports are ONLY available to sites using an ENTERPRISE license. If you wish to enable this functionality within your site, please contact your site owners as the Kahootz Support Team can only accept written approval from them along with the detailed information as requested below.

If you've already configured Power BI / Tableau on your site & wish to apply dashboard items, please refer to this [article](#).

### Site Configuration

To enable "**Power BI**" on your site, the Kahootz team ([KB](#)) will require the following information from a Site Owner:

- Written confirmation approving the request.
- Power BI Client ID ie: 70c74f1d-cjh717-6x21-a789-6kaho7j8e6ch.
- Power BI User Name ie: [kahootz.powerbi@support.onmicrosoft.com](mailto:kahootz.powerbi@support.onmicrosoft.com).
- Power BI Password.

#### Power BI Widget Configuration

Inherit  Override

**Enabled**

**Client ID**

**User Name**

**Password**

Leave as \*\*\*\*\* to keep the current password

Once the support team has received your information, they'll apply the details to your site & will test/confirm your settings.

**Success**

Power BI Configuration is OK.

To enable "**Tableau Reports**" on your site, the Kahootz team ([KB](#)) will require the following information from a Site Owner:

- Written confirmation approving the request.
- Tableau Trusted URL ie: <<[URL to your Tableau](#)>>
- Tableau Site Name ie: kz\_tab\_reports.
- Tableau User Name ie: support\_kahootz.

### Tableau Widget Configuration

Inherit  Override

**Enabled**

**Trusted URL**

**Site Name**

**User Name**

When support receives your information, they'll apply the details to your site & provide a list of specific Trusted IP addresses.

-  For more detailed information, please refer to this URL link:  
[https://help.tableau.com/current/server/en-us/trusted\\_auth.htm](https://help.tableau.com/current/server/en-us/trusted_auth.htm)

Once Power BI / Tableau has been configured, you'll be able to add them as dashboard items. Please refer to this [article](#).
