

Recycle Bin

Software Support - 2022-10-14 - Workspaces

Anything deleted in a workspace gets put in the recycle bin for 30 days.

Workspace managers can see the recycle bin contents via the **Manage Workspace** cogwheel icon > **Recycle Bin**.

I can confirm that the Workspace managers have permission to restore any of those items from the recycle bin area.

Items that have been in the recycle bin for more than 30 days will be automatically deleted and are no longer recoverable.

Please note that technically we run a 30-day rolling backup; therefore, we may be able to recover data after that period.

However, I'm afraid there would be costs involved in using this service as we have to pull data from your backups.
