Recycle bin

Software Support - 2017-03-13 - [Workspaces](#)

Anything deleted in a workspace gets put in the recycle bin for 30 days.

Workspace managers can see the recycle bin contents via the **Manage Workspace** cogwheel > **Recycle Bin**.
Workspace managers can also restore items from the recycle bin.

Items that have been in the recycle bin for more than 30 days will be automatically deleted and are no longer recoverable.
