What Web Browsers / Applications are Supported?

Software Support - 2022-11-10 - Support & Troubleshooting

Kahootz supports the following web browsers:

- Microsoft Internet Explorer (version 10 onwards)
- Edge
- Google Chrome
- Firefox
- Opera
- Safari

Kahootz uses fully standards-compliant HTML so it should work on other browsers too.

Kahootz Tip: Please make sure you've got the most up-to-date browser version installed.

The software can also be accessed via tablets and smartphones (see [Kahootz on Mobile](#)). There is no need to download an app on your device - you can simply log in via an internet browser.

Also, because Kahootz is accessible & exceeds WAI level AA.

It'll work with assistive technology ("AT") browsers & equipment for those with sight and motor problems too.
